

# Gaining Employment Outcomes

4 August 2009

Hamilton

Are you interested in improving employment outcomes for people with experience of mental illness? Would you like to hear more about the challenges and opportunities of implementing employment services? If so, the Gaining Employment Outcomes forum in Hamilton is for you!

The Waikato Mental Health Employment Group exists to increase sustainable employment outcomes for people with experience of mental illness. The round table group includes representatives from organisations including Work and Income, Waikato District Health Board, Workwise and other NGO's.

Workwise is an important element within the Waikato Mental Health Employment Group. Workwise aims to seek out and create employment opportunities for people with experience of mental illness. It offers a front line perspective to the Group.

Waikato Mental Health Employment Group and Workwise will host the Gaining Employment Outcomes in Hamilton on Tuesday 4 August, 2009. The event will see the return of Dr Geoff Waghorn to New Zealand. He'll present his views on Individual Placement and Support (IPS). The forum aims to further develop common language and understanding and to share expertise from different perspectives. It will be ideally suited to practitioners, clinicians and case managers across government and non-government agencies.
